CAR WASH MINDER

Real-time chemical intelligence for car wash operators

CHEMICAL MONITORING FOR CAR WASHES

Car Wash Chemical Management Made Simple

Track every injection, keep inventory current, and know the moment chemical usage moves out of range - from any location.

REAL-TIME CHEMICAL USAGE

Every bay. Every chemical. Every wash.

UP TO 30%

LESS CHEMICAL WASTE

with precise tracking

0.5 mL

MEASUREMENT PRECISION

for injection events

30 SEC

DASHBOARD UPDATES

for near real-time visibility

Always know.

Replace periodic titration, manual counts, and customer-discovered problems with per-wash data and proactive alerts.

WHAT YOU CAN SEE

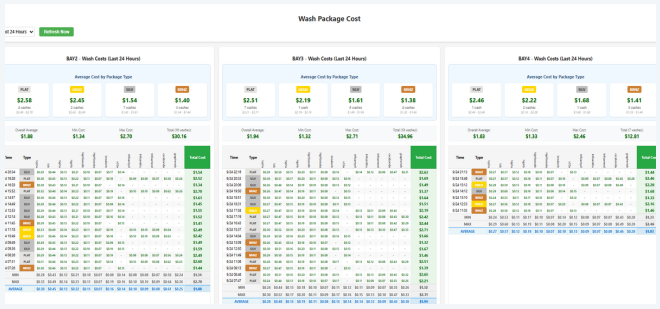

Catch problems before they get expensive.

Monitor usage, inventory, costs, wash volume, and multiple locations from one cloud dashboard.

Smart alerts

Email and SMS notifications flag high or low usage so your team can respond before wash quality suffers.

True cost per wash

See the chemical cost of each package, compare bays, and identify opportunities to protect margin.

One system. Six practical advantages.

- **REAL-TIME** — Every injection event
- **INVENTORY** — Automatic barrel levels
- **ANALYTICS** — Usage and cost trends
- **MULTI-SITE** — All locations in one view
- **ALERTS** — Configurable email and SMS
- **REPORTS** — Daily and weekly summaries

Up and running in four steps

1. **Splice flow meters** — Install before each injector.
2. **Automatic detection** — Measure every injection.
3. **Secure cloud processing** — Transmit and store data.
4. **Act on insights** — View, manage, and alert.

FLOW METER SYSTEM

$2,500 per sensor box

Up to 7 injection points | Wi-Fi | Setup support

Cloud dashboard, email and SMS alerts. Monthly subscription required.

Multi-bay discounts, custom configurations, and installation options available.
